

What can I do?

If you are concerned about the Government wasting billions of pounds of taxpayers' money on a project which cannot be justified on either financial or environmental grounds, and if you care about damage that the proposed rail line would cause and would like to help to stop it, please write, expressing your concerns, to as many of the following as you can:

To get the broadest support, it is suggested that comments focus on the flaws in the financial and broader, low-carbon environmental arguments, and then on the damage to an AONB. If the thrust of your letter is primarily about protecting the local area, this could be seen as just "Not In My Back Yard" (NIMBY-ism) and have less impact. Sadly, the reality is that they don't care about the Chilterns AONB.
